Advertorial

Earth colours add drama

(NC)—The colour Cinder is a show-stopper in kitchen sinks this year. Lavish single-bowl models like the Blanco Modex and Precis Cascade are both fashioned in this richly dense shade of a "dark pearl-escent charcoal with a hint of brown". Interior designers say they are especially eager to demonstrate that "the natural stone texture of the Cinder colour has an extraordinary ability to complement so many other hues and shades chosen for a kitchen." Cinder is 'complex but velvety warm; dramatic but also serene'. It joins six other earth colours in the Blanco line up to date. To see them, take a look at the 'silgranit' sinks at www.blancocanada.com.
